

HEAVY DUTY

SPENCER
COATINGS

**COMPREHENSIVE REPAIR, PROTECTION
AND MAINTENANCE SOLUTIONS.**

HEAVY DUTY

Your company's assets are constantly under attack from corrosion, particularly in hostile environments such as marine or heavy industrial. Corrosion can eventually lead to catastrophic failure of plant and equipment.

Spencer Coatings Limited provides cost-effective solutions to corrosion problems with coating systems engineered, manufactured and applied on site to meet your performance requirements.

Corrosion protection for structural steelwork.

Protection in even the most extreme environment.

Founded in 1909, Spencers operate from modern facilities in Aberdeen, with branches in Belfast and Nottingham. In 1998 Spencer Coatings Limited started producing coatings in China at its purpose built factory in Shandong Province. As well as the UK and China, Spencers are a major exporter of heavy duty coatings throughout the world. Our research and development, manufacturing, distribution and technical service provide a single source facility for all your coating needs.

Spencer Coatings offer a complete range of products for steel, concrete, wood and other substrates. Working closely with asset owners, specifiers and contractors to achieve the best specifications and providing cost-effective long term protection of your assets. Full support is provided with our consultancy service, aiding the specifier and contractor from start to finish with advice and information at every step. From the preparation of detailed specifications and procedures through to on site inspection of finished work, Spencers can provide a total coatings solution.

Spencer Coatings Limited manufacture a very comprehensive range of products for a wide variety of markets and applications. For the heavy duty market the key ranges are Bondon, Acothane, Wasser and Floorcote.

Bondon

Bondon is a range of two-component epoxies and polyurethanes which provide multi-coat systems for steelwork protection. Products include metallic zinc and zinc phosphate primers, surface tolerant and moisture tolerant primers and a range of high build intermediate and finishing coats including glass flake and anti-abrasion coatings.

Acothane

Acothane is a range of extremely versatile pure urethane and tar modified urethanes designed to give very long term corrosion protection to buried, subsea and above ground pipelines, vessels, structural steelwork and concrete in very aggressive environments. The Acothane products are very high build, solvent free two-component, possessing outstanding physical properties in terms of flexural strength, tensile strength, impact, abrasion, penetration resistance and low temperature cure.

ACOTHANE

Long term protection for marine vessels.

Ongoing research and development.

Wasser

Wasser is a range of single component moisture cured urethanes based on unique resin technology that provides long term protection, combined with very fast application in the most extreme environmental conditions from -12°C to 40°C , with humidity as high as 99% and no dew point restrictions. With its fast cure characteristics, a typical three coat system can be applied in less than one day.

Floorcote

Floorcote is a range of coatings designed for application to concrete floors and steel decks. Available as one or two component products, solvent based and water based and in smooth or non-skid versions. This comprehensive range has been extensively used for many years protecting and enhancing floors and decks in a wide range of environmental conditions.

APPLICATIONS

Spencer Coatings extensive ranges provide solutions for all corrosion problems. They have been applied extensively to bridges, ships, drill rigs and offshore production platforms, power plants, oil refineries and chemical plants. Our products have been used for protection, decoration, heat resistance, abrasion resistance, and to provide visibility at night. Our products can be used in immersion conditions, low and high

temperature conditions and in the most hostile industrial and marine environments.

Using the very best coatings technology, backed up by comprehensive technical service, Spencer Coatings Limited bring their resources and experience to any corrosion problem and provide the very best long term solution.
